

Cojac.net has LAUNCHED!

That's right! Cojac has got a new website!

Cojac.net now has a brand new look and feel!

Cojac.net has received a massive upgrade from its old existence on the web. The website will be managed 24/7 to make sure that all news is up to date and the sites style is always kept to its modern, clean look and feel. The new Cojac website features many more pages than its previous self.

The homepage is designed to showcase the most recent news articles in a large slideshow, along with the Tesseract's teaser video. The homepage now has a much nicer, sleek and eye-catching layout.

The Old

The old Cojac website was created some years ago and was just a single page containing very little information about the company, what it does and the controller. The website simply outlined some points in which very early prototypes of a multi-axis controller could be used.

Cojac Ltd 
Controlling tomorrows world today

Innovate to Control

Cojac Ltd established in 2006 to innovate and produce control devices

Objective:

To Invent Simpler input devices and develop multi axis controllers for

The New

So, what's new with Cojac.net?

We have got rid of the old logo and replaced it with a modern version of the same style. With this we also changed the tagline from "Controlling tomorrows world today" to "Immersive. Intuitive. Innovative.", three short yet powerful statements about the company and its products.

We now have all of our contact addresses created to respond to any query, whether it's to invest or to send us your CV. On our jobs page we now have a form which can be used to let us know of your talents and you will be first to know when we have openings suited to you!

Keep up to date with Cojac's latest project, The Tesseract below:
